WORK EXPERIENCE

• WEB DEVELOPER

SIDEHUSTLE

2021

Joined a team as an intern Web developer, it was my introduction into web development learning about basic HTML & CSS. I also got to learn and began my journey in tech from there, meeting various types of developers out there with of course i learned and picked a lot from everyone around me at the period. It was pretty less coding because i was a starter and needed to start from the basics before moving to the dirty work. It was a solid and awesome experience i had learning how to learn in Tech.

• FULL-STACK DEVELOPER

GOMYCODE

2021 - 2022

I completed my Full-Stack JavaScript boot-camp journey and i have my certificate as a Full-Stack Developer. It was indeed challenging and an awesome time learning with such amazing developers in my team. I learnt to build some simple Front-end project using React, as a team we got to build a movie-card where we can add and remove movie in the cart.
