WORK EXPERIENCE

• Web developer Intern

EMPLOYER

April - August 2021

Joined a team as a Web developer intern, it was my introduction to web development learning about basics of HTML & CSS. I got to learn and began my journey in tech from there, met various types of developers which of course i learnt a lot from everyone around me at that period. It was less coding because i was a starter and needed to learn about the basics first before am able to work on a project. It was a solid and awesome experience i had learning from scratch.

• Full-Stack Development boot-camp

GOMYCODE

August - January 2022

I completed my Full-stack JavaScript development boot-camp and was given a certificate. It was indeed a challenging and also an awesome journey, meeting various people in the tech space to push me to become a better developer everyday.

EDUCATION

• College Diploma

BAMFEM COMPREHENSIVE HIGH SCHOOL

2007 - 2012
